

SHARMA S

AI Engineer | Data Scientist | ML Engineer | NLP & LLM Specialist

spunkyboy26@gmail.com • +91 9363382279 • Madurai, Tamil Nadu • [LinkedIn](#) • [GitHub](#)

PROFESSIONAL SUMMARY

Innovative AI Engineer and Data Scientist with a strong foundation in machine learning, deep learning, NLP, and large language model (LLM) integration. Demonstrated ability to architect and ship production-ready AI systems — from computer vision pipelines and generative AI applications to real-time data platforms — delivering measurable business impact across each engagement. Proficient in Python, TensorFlow, PyTorch, Hugging Face, and LangChain, with hands-on experience in cloud-based AI workflows (Microsoft Azure) and MLOps practices. Backed by 7+ end-to-end project deliveries, 2 industry internships, and 10+ technical certifications, I bring both the engineering depth and collaborative mindset that high-performing AI teams demand. Eager to solve complex, real-world problems and drive intelligent product innovation from day one.

TECHNICAL SKILLS

Programming Languages: Python, Java, C, C++, SQL, HTML, CSS, PHP

ML / DL Frameworks: Scikit-learn, TensorFlow, PyTorch, Keras, OpenCV, NLTK, SpaCy, Hugging Face Transformers

LLM / NLP / GenAI: LangChain, Prompt Engineering, Sentence Transformers (mBERT, LaBSE), RAG, Text Generation, Multilingual Embeddings

Cloud & DevOps: Microsoft Azure (AI Fundamentals), Docker, Git, GitHub, GitHub Actions, CI/CD

Data & Analytics: Pandas, NumPy, Matplotlib, Seaborn, Power BI, Tableau, Excel

Databases: MySQL, PostgreSQL, Firebase (NoSQL), Database Design, Query Optimization

Web & Mobile: Flask, Flutter, Bootstrap, REST APIs, Firebase Auth

Dev Tools: Jupyter, Google Colab, VS Code, PyCharm, Kaggle, Postman

Soft Skills: Problem Solving, Leadership, Critical Thinking, Team Collaboration, Communication

PROFESSIONAL EXPERIENCE

Data Science Intern | Pyroguard Development & Security, Coimbatore

May 2023 – Jun 2023

- Processed and analyzed 3+ real-world security datasets using Python, Pandas, and NumPy; reduced data inconsistencies by ~40% through structured preprocessing pipelines.
- Built EDA workflows using Matplotlib and Seaborn, surfacing key patterns that directly informed anomaly detection strategy decisions for the engineering team.
- Developed and deployed a supervised classification model on live security data achieving ~82% accuracy, demonstrating practical machine learning application in a production business context.

Flutter & PHP Developer Intern | Wisual Technologies, Chennai

Apr 2024 – May 2024

- Engineered 4 cross-platform mobile screens in Flutter using reusable widget architecture, reducing estimated development time by ~35% versus building from scratch.
- Built PHP backend modules for form handling and dynamic rendering, integrating with MySQL to support persistent data storage for 500+ records.
- Maintained clean Git commit history throughout the project, enabling seamless code reviews and zero merge conflicts across the entire internship duration.

PROJECTS

1. Cross-Lingual Title Verification Using Multilingual Embeddings & Dynamic Rule-Based Filtering

- Built an NLP pipeline using multilingual sentence embeddings (mBERT / LaBSE) to verify title authenticity across 5+ languages, reducing false positive match rates by ~30%.
- Stack: Python, Hugging Face Transformers, Scikit-learn, Pandas

2. Fake News Detection Using NLP & Supervised Learning

- Trained a binary classifier on 40,000+ articles using TF-IDF combined with Logistic Regression / Random Forest ensemble, achieving ~94% validation accuracy.
- Applied a complete NLP preprocessing pipeline: tokenization, stopwords removal, and lemmatization using NLTK.

3. Text-to-Image Generation Using Generative AI (Stable Diffusion)

- Deployed a Stable Diffusion pipeline that converts natural language prompts into high-quality images; optimized inference time via prompt batching and GPU acceleration on Google Colab.

4. Age & Gender Prediction Using Deep Learning (CNN)

- Trained a multi-output CNN on 20,000+ facial images achieving ~88% gender classification accuracy and mean age error of ~5 years; improved generalization with data augmentation techniques.

5. Real-Time Chat Application with Firebase

- Developed a full-stack messaging application with Firebase Realtime Database and Auth, supporting 50+ concurrent users with sub-second sync, message threading, and read receipts.

6. Book Recommendation System (Collaborative Filtering)

- Implemented user-based and item-based collaborative filtering on 10,000+ books, delivering personalized Top-10 recommendations using cosine similarity scoring.

7. Hospital Management System (Web Application)

- Developed a full-stack web portal (HTML, CSS, PHP, MySQL) centralizing patient, doctor, appointment, and records modules — significantly reducing manual record-keeping overhead.

EDUCATION

B.Tech – Artificial Intelligence & Data Science

2022 – 2026

Karunya Institute of Technology and Sciences, Coimbatore | CGPA: 6.35

HSC (Class 12)

2020 – 2022

SBOA Matric Higher Secondary School, Madurai | 70%

CERTIFICATIONS

- Azure AI Fundamentals – Microsoft
- Python – Kaggle, Cisco, Udemy, Simplilearn
- Java – Cisco, Udemy, Infosys
- Machine Learning – Great Learning
- Data Visualization with Pandas – Kaggle
- Flutter Development – Udemy
- HTML & CSS – Udemy
- Adobe Photoshop & Illustrator – Certified

EXTRACURRICULARS & COMMUNITY

- Hackathon Participant – Built functional AI/software prototypes under 24–48 hour constraints with cross-functional teams.
- Computer Science Club – Engaged in peer coding sessions, technical workshops, and algorithm problem-solving activities.
- Code to Develop Volunteer – Contributed development effort to technology-driven social impact software projects.
- NSS Member, Karunya University – Led community outreach drives, social development events, and campus volunteer programs.
